#### Table Notes:

<sup>1</sup> Results for the period January 1, 1989, through July 1, 1995, include wrap accounts and are shown as supplemental information. For this period, wrap accounts represent on average 24% of the composite assets. Gross returns for wrap accounts are stated gross of all fees and brokerage firm wrap fees; net returns have been reduced by all fees and brokerage firm wrap fees, which include trading costs, portfolio management, custody, and other administrative fees.

<sup>2</sup> Dispersion is an asset-weighted standard deviation for the accounts in the composite for the entire year (or year-to-date) and is calculated using gross returns. "N/A" represents when dispersion is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

<sup>3</sup> "Total Assets" include our regulatory assets under management ("GIPS® Firm Assets") and our advisory-only "UMA Assets". EIC has no trading discretion for UMA accounts and provides a model portfolio to the program sponsor or overlay manager. The "UMA Assets" and "Total Assets" amounts are shown as supplemental information.

Additional Notes: The three-year annualized standard deviation measures variability of the composite (gross of fees) and the benchmark returns over the preceding 36 month period.

## All-Cap Value Composite Report

---

### Disclosures:

Equity Investment Corporation (EIC) is an SEC-registered, independent investment adviser incorporated in the state of Georgia. EIC has been providing investment advisory services to clients since 1986.

From January 1, 1986, through December 31, 1999, Jim Barksdale was primarily responsible for creating and achieving the performance results. Over that time period, the All-Cap Value composite gained 14.3% (annualized) (13.4% net of fees), while the Russell 3000® Value Index rose 15.6% (annualized).

Andrew Bruner joined as the second member of EIC's investment team in December 1999. From that point through the present day, portfolios have been managed using a team-based approach. Terry Irrgang became the third member of our investment team in April of 2003. Ian Zabor became the fourth member of our team, joining EIC in July of 2005. From January 1, 2000 through March 31, 2022, our investment team was responsible for the All-Cap Value composite increasing by 10.5% (annualized) (9.8% net of fees); the Russell 3000 Value Index gained 7.6% (annualized).

Effective September 30, 2016, we implemented a succession plan to ensure the continuity and stability of our firm. In a transaction that closed on that date, a new investment adviser entity formed by Messrs. Bruner, Irrgang, and Zabor purchased substantially all of the assets and assumed all of the liabilities necessary for EIC's continuous operation from Mr. Barksdale. That new registrant succeeded to all of EIC's business. As planned, Mr. Barksdale's tenure at EIC ended in August of 2019 when his transitional employment agreement expired. From the date of the succession through March 31, 2022, our investment team was responsible for the All-Cap Value composite advancing 13.3% (annualized) (12.7% net of fees), versus an 11.2% (annualized) increase for the Russell 3000 Value Index.

During all times after 1999, our investment team has been responsible for achieving the performance results shown in the table on page 1.

Performance numbers are the value-weighted, time-weighted, total return composite results of fully discretionary, internally administered non-wrap All-Cap Value Equity accounts. The strategy employs a flexible framework (not constrained by any cap size limitations) of investing in high-quality, well-managed companies, while at the same time avoiding those that look inexpensive relative to their historical record but are actually in structural decline. Returns are generally presented net of foreign withholding taxes on dividends, interest income, and capital gains; however, returns for some accounts are presented gross of foreign taxes depending on the treatment by their custodian. The composite creation and inception date is January 1, 1986. All accounts included in the composite are managed according to similar investment guidelines. The benchmark index is the Russell 3000® Value Index (which excludes an advisory fee), and was chosen because it is representative of the composite's investment style. The Russell 3000 Value Index measures the performance of the largest 3000 US companies in the value segment of the US equity universe. The Russell 3000 Value Index is based on the Russell 3000® Index, a market-capitalization weighted equity index representing approximately 98% of the investable US equity market. Performance results earned on behalf of EIC's clients are calculated gross of investment advisory fees, and net returns reflect EIC's advisory fees.

## All-Cap Value Composite Report

---

### Disclosures (cont.):

EIC's after-fee performance through 1988 is based on typical management fees of 1% per year. Beginning in 1989, performance is based on actual fees. Prior to 2003, EIC charged clients a fixed percentage of the assets managed, which ranged from .50% to 1.5%. Some clients chose an incentive fee arrangement and were charged a base fee (ranging from .50% to 1.00%) plus an incentive fee which was triggered by the gross of fees performance of the account versus a Benchmark index. Performance has been measured on a monthly basis from January 1, 1986, to present. Periods are geometrically linked to obtain the quarterly and annual results. Eligible new accounts are added to the composite at the beginning of the first full quarter under EIC management. Trade date accounting with monthly valuations and adjustments for large cash flows are used. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The US Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Economic and market conditions have differed over the time period displayed, and likewise will be different in the future. Policies for valuing investments, calculating performance and preparing GIPS Composite Reports are available upon request.

EIC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. EIC has been independently verified for the periods January 1, 1986, through December 31, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to the composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The All-Cap Value composite has had a performance examination for the periods January 1, 1986, through December 31, 2021. The verification and performance examination reports, as well as a complete list and description of all the firm's composites, are available upon request by contacting Equity Investment Corporation, 1776 Peachtree Street NW, Suite 600S, Atlanta, GA 30309. The firm's list of broad distribution pooled funds is available upon request. Prospective clients should be aware that results are historical and do not imply future rates of return or volatility for EIC or the indices, which may be materially different from the past and from each other.

The investment management fee schedule is as follows: Clients are charged a fixed percentage of the assets managed, according to the size and type of account, as well as other considerations, such as account servicing needs, administrative requirements, and overall relationship size. Management fees may range from 0.35% to 1% of assets managed, and may be paid in advance or arrears, depending on the agreement with EIC. Further information about fees and compensation is discussed in EIC's form ADV Part 2 ([www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov)).
